Tissue Transglutaminase Ab IgA	This test was performed at Burnaby Reference Laboratory - 3680 Gilmore Way, Burnaby, BC, V5G 4V8				
Tissue Transglutaminase Ab IgA	<0.5 NEGATIVE IgA antibody to tissue transglutaminase has approximately 95% sensitivity and specificity for gluten enteropathy. False negative results may occur with a gluten-restricted diet or IgA deficiency. The BioPlex method includes an internal control to confirm IgA is sufficient, thus avoiding false negatives due to IgA deficiency.		<12.0	U/mL	07/Jun/2024 14:00
